## Technical Skills

### Overview

## Certificates

FrontEnd Development from **Coding Ninjas** (view)

Programming Foundations with HTML, CSS & JS from **COURSERA** (view)

Algorithmic ToolBox from **COURSERA** (view)

Python Data Structures from **COURSERA** (view)

## Strength

Positive and practical approach, Quick Learner, Good communication Skills.

### Languages

Hindi, English, Telugu

## Experience

Aug 2020 -  
Aug 2021

### Implementation Engineer

Magnaquest Technologies

- Develop and execute testing scenarios, testing data, test plans and scripts.
- Working knowledge of SQL (e.g. Writing basic queries and stored procedures, managing maintenance plans, DB restores/backups).
- Worked on Multiple Projects resolve implementation, calculation and conversion issues.

## Education

Aug 2016 -  
Sept 2020

### B.TECH

Jawaharlal Nehru Technological University, Hyderabad.

### COMPUTER SCIENCE ENGINEERING

[CGPA - 7.26]

Jul 2014 -  
Jun 2016

### BIE

Sri Chaitanya Junior Kalasala.

### INTERMEDIATE EDUCATION

[CGPA - 8.2]

Jun 2004 -  
Apr 2014

### SSC

Venus High School.

### SECONDARY EDUCATION

[CGPA - 8.8]

## Projects

**FELONY DELEGATE** Android, Java, Amazon Web Server, Eclipse (IDE). (view)

- Felony Delegate is an application that facilitates the society by helping to report any ongoing crime in the area.
- Which will then be monitored by a central authority of that particular state. We are proposing people don't go to police station and give crime complaint.
- We are developing Android application people give complaints through app and photo footage also send to department.

**Smart Helmet** C Lang, Arduino IDE, Arduino uno, GSM Module, GPS Module. (View)

- The purpose of this helmet is to detect the "fall of a motorcyclist".
- As motor-cyclist meets with an accident a notification is sent to the family members or friends.
- It also helps in detecting the amount of petrol if its less than 1 litre.

**Music Player** HTML, CSS

(View)

- Music Player consists of a beautiful interface with lots of functionalities.
- It has different sections such as Artists, Party, Travel, Recently Played.
- The best thing is only HTML & CSS is used for creating the player.

**Super Hero Hunter** HTML, CSS, JavaScript

(View)

- Functionality of the app is to search, list of Super Hero's, where it provides an auto search suggestion for each letter.
- An API(<https://www.superheroapi.com/>) is used to fetch the data of superhero's.
- We can add & remove favourite super hero from favourite list and view details by clicking on their name.

## Extra Curricular Activities

- Iam a student of NSS (National Service Scheme).
- Participated in two days national workshop on "Machine Learning with Python".
